

David Anderson's Photos Before, just after and a week after

Happy Valley Cassia Blitz Weeding Trip: 29th April - 5th May 2018

GPS Coordinates: [25degrees20.432 South](#) [153degrees 12.137 East](#)

This is the site prior to any work being undertaken. Some of the yellow flowers closer to the swamp are a part of a mat of Singapore Daisy to be treated at a later date

This is the site at the end of a very busy week. Only one yellow cluster of flowers was visible and this was quickly eradicated.

This is the site the following week. The brown on the hillside is the dead foliage of Easter Cassia. This is not the only site surrounding Happy Valley that has been purged of Easter Cassia but it was open enough to permit Before and After Photos.
